

Davis Select International ETF

Selective. Attractive Growth. Undervalued.

What gives us confidence that Davis Select International ETF will build wealth for our shareholders in the years and decades to come? The compelling attributes of our businesses.

By being highly selective and rejecting the vast majority of companies in the index, the companies of Davis Select International ETF have grown more than the companies in the index, yet are 28% less expensive. In fact, this gap between price and value is among the widest we have ever seen. We believe this sets the stage for attractive returns in the years ahead.

As of 6/30/25. The Attractive Growth and Undervalued reference in this piece relates to underlying characteristics of the portfolio holdings. There is no guarantee that the Fund performance will be positive as equity markets are volatile and an investor may lose money. Past performance is not a guarantee of future returns. Performance may vary. The inception date for Davis Select International ETF is 3/1/18.

1. Five-year EPS Growth Rate (5-year EPS) is the average annualized earnings per share growth for a company over the past 5 years. The values shown are the weighted average of the 5-year EPS of the stocks in the Fund or Index. Approximately 11.91% of the assets of the Fund are not accounted for in the calculation of 5-year EPS as relevant information on certain companies is not available to the Fund's data provider.

2. Forward Price/Earnings (Forward P/E) Ratio is a stock's current price divided by the company's forecasted earnings for the following 12 months. The values for the portfolio and index are the weighted average of the P/E ratios of the stocks in the portfolio or index.

This report is authorized for use by existing shareholders. A current Davis Select International ETF prospectus must accompany or precede this material if it is distributed to prospective shareholders. You should carefully consider the Fund's investment objective, risks, charges, and expenses before investing. Read the prospectus carefully before you invest or send money.

Shares of DINT are bought and sold at market price (not NAV) and are not individually redeemed from the ETF. There can be no guarantee that an active trading market for ETF shares will develop or be maintained, or that their listing will continue or remain unchanged. Buying or selling ETF shares on an exchange may require the payment of brokerage commissions and frequent trading may incur brokerage costs that detract significantly from investment returns.

Objective and Risks. Davis Select International ETF's investment objective is long-term growth of capital. There can be no assurance that the

Fund will achieve its objective. Some important risks of an investment in the Fund are: **stock market risk; common stock risk; market trading risk:** includes the possibility of an inactive market for Fund shares, losses from trading in secondary markets, periods of high volatility, and disruptions in the creation/ redemption process. **ONE OR MORE OF THESE FACTORS, AMONG OTHERS, COULD LEAD TO THE FUND'S SHARES TRADING AT A PREMIUM OR DISCOUNT TO NAV; exchange-traded fund risk:** the Fund is subject to the risks of owning the underlying securities as well as the risks of owning an exchange-traded fund generally; **foreign country risk; exposure to industry or sector risk:** significant exposure to a particular industry or sector may cause the Fund to be more impacted by risks relating to and developments affecting the industry or sector; **headline risk; foreign market risk; large-capitalization companies risk; manager risk; authorized participant concentration risk:** to the extent that Authorized Participants exit the

business or are unable or unwilling to proceed with creation and/or redemption orders with respect to the Fund and no other Authorized Participant is able to step forward to create or redeem Creation Units, Fund shares may trade at a discount to NAV and could face delisting; **China risk - generally; cybersecurity risk; emerging market risk:** securities of issuers in emerging and developing markets may present risks not found in more mature markets; **depository receipts risk:** depository receipts involve higher expenses and may trade at a discount (or premium) to the underlying security; **fees and expenses risk; foreign currency risk; mid- and small-capitalization companies risk; and shareholder concentration risk:** from time to time, a relatively large percentage (over 20%) of the Fund's shares may be held by related shareholders. A large redemption by one or more of such shareholders may reduce the Fund's liquidity, may increase the Fund's transactions and transaction costs, may result in substantial capital gains

distributions for shareholders, and may increase the Fund's ongoing operating expenses, which could negatively impact the remaining shareholders of the Fund. See the prospectus for a complete description of the principal risks.

We gather our index data from a combination of reputable sources, including, but not limited to, Lipper, Clearwater Wilshire Atlas and index websites.

The MSCI ACWI (All Country World Index) ex US is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets, excluding the United States. The index includes reinvestment of dividends, net of foreign withholding taxes. Investments cannot be made directly in an index.
