

ETFs: Selective. Attractive Growth. Undervalued.

“What gives us confidence that our ETFs will build wealth for our shareholders in the years and decades to come? The compelling attributes of our businesses.

By being highly selective and rejecting the vast majority of companies in the index, we’ve built portfolios in which the gap between price and value is among the widest we have ever seen. We believe this sets the stage for attractive returns in the years ahead.”

Chris Davis, Portfolio Manager

1. Five-year EPS Growth Rate (5-year EPS) is the average annualized earnings per share growth for a company over the past 5 years. The values shown are the weighted average of the 5-year EPS of the stocks in the Fund or Index. Not all assets of the Funds are accounted for in the calculation of 5-year EPS as relevant information on certain companies is not available to the Funds' data provider. Approximate amounts are:

DUSA: 0.54%; DINT: 17.51%; DWLD: 10.75%; DFNL: 6.86%.

2. Forward Price/Earnings (Forward P/E) Ratio is a stock's price at the date indicated divided by the company's forecasted earnings for the following 12 months based on estimates provided by the data provider. The values for the Funds are a weighted average of the stocks in the Funds.

Shares of Davis ETFs are bought and sold at market price (not NAV) and are not individually redeemed from the ETF. There can be no guarantee that an active trading market for ETF shares will develop or be maintained, or that their listing will continue or remain unchanged. Buying or selling ETF shares on an exchange may require the payment of brokerage commissions and frequent trading may incur brokerage costs that detract significantly from investment returns.
